Professional Summary Full Stack Software Engineer focused on building scalable web applications and high-performance interfaces. I have solid proficiency in the Front-End ecosystem using React.js and React Native to create dynamic and responsive user experiences.

On the Back-End, I develop robust architectures and RESTful APIs using Python (FastAPI) and Node.js, with strong experience in modeling and integrating relational databases (PostgreSQL and SQLite).

With practical experience in the software development lifecycle and agile methodologies (Scrum, Kanban, XP), I apply clean code principles, advanced programming logic, and software architecture to deliver solutions that combine technological innovation with business efficiency.

Technical Skills (Hard Skills) * Front-End: React.js, React Native, JavaScript, HTML5, CSS3, Bootstrap, Figma.

- **Back-End:** Python, Node.js, FastAPI, RESTful APIs.
- **Databases:** PostgreSQL, SQLite.
- **Software Engineering:** Agile Methodologies (Scrum, Kanban, XP), Software Architecture, Programming Logic, Version Control (Git/GitHub).

Professional Technology Experience Freelance Full Stack Developer / Founder *Marvin Site Builders* | 2026 – Present * End-to-end development of web platforms, corporate websites, and landing pages, ensuring responsiveness and performance.

- Creation of B2B automation solutions, including the development of a chatbot in Node.js and TypeScript with direct WhatsApp integration for dynamic report generation and execution of automated backup routines.

Software Engineering Intern *CS Sustentáveis* | 2025 – Present * Development of a complete web system for real-time construction material inventory control, implementing dynamic monitoring of inflows and outflows, alongside automated alerts.

- Direct involvement in the digitization of internal processes, translating complex business rules into efficient software solutions.
-

Highlighted Projects * **Python Payment Gateway: Payment gateway system for transaction processing and back-end solutions.** (*Source code available on GitHub*).

- **PWA Bank Application:** Banking application in Progressive Web App (PWA) format, featuring a native experience and responsive interface. (*Source code available on GitHub*).
 - **Admin Dashboard Landing Page:** Modern and responsive administrative interface for media management, developed with React. (*Source code available on GitHub*).
-

Other Professional Experiences * **Assistant Manager | Sport.com (2020 – 2024):** Team leadership, management of sales indicators, and customer experience-focused service.

- **Supervisor | Contax (2012 – 2014):** Operational team management, employee training, and quality metrics monitoring.
-

Academic Education * **Postgraduate Degree in Software Engineering | Faculdade Metropolitana | In progress (Expected: 2026)** * **Bachelor's Degree in Systems Analysis and Development | Estácio de Sá | Completed: 2025**

Technical Courses and Certifications * **Java Development Track: Debugging, OOP Fundamentals, Data Structures, Loops, Conditionals, and Exception Handling – DIO (2025)**

- **Microsoft Ecosystem:** Data Analysis, Dataverse, Dynamics 365 (ERP), Finance and Operations – Microsoft
- **Fênix Courses:** Kotlin Lang and Android Express – Taught by Tiago Aguiar
- *Note: Supplementary courses in mobile technologies and programming*
